

Client: A growing biotechnology company that's using an engineering approach to drug development. Their technology allows them to treat diseases within a fraction of the time and cost, and they have a patent pending in 6 countries including the United States.

OBJECTIVES:

- Develop high quality business strategies and plans ensuring their alignment with short-term and long-term objectives
- Overseeing all operations and business activities to ensure they produce the desired results and are consistent with the overall strategy and mission
- Oversee the company's fiscal activity, including budgeting, reporting, and auditing
- Assure all legal and regulatory documents are filed and monitor compliance with laws and regulations
- Build alliances and partnerships with other organizations, and utilize prior networks and experiences with investors to position the company in preparation for Series A funding

SUCCESS FACTORS:

By partnering with our client's founding leadership team, Prestige Scientific was able to quickly identify candidates with experience building and leading engineering-driven biotechnology companies from the ground up. Prestige presented candidates with past successes and experience leading companies with similar innovative technologies, who have the skills to meet the company's short and long-term objectives. This critical hire will help this organization achieve ambitious goals, secure funding, and gain more industry attention through strategic business development plans.
