

Client: A publicly-traded, clinical-stage biotechnology company focused on the development and potential commercialization of medicines to treat rare diseases. This organization has several clinical and nonclinical programs in their pipeline.

OBJECTIVES:

- Serve as the GMP expert to executive leadership and authorities
- Help develop GMP Quality strategies and systems
- Overseeing all GMP Quality activities to ensure they produce the desired results and are consistent with the overall strategy and mission
- Assure all quality systems are in place to support regulatory filings and meet strategic milestones in preparation for filing the company's first NDA

SUCCESS FACTORS:

By partnering with our client's leadership team, Prestige Scientific was able to quickly identify candidates with significant GMP Quality experience at clinical-stage biotechnology companies. Prestige presented candidates with past successes and experience designing GMP Quality strategies and systems who have the skills to meet the company's short and long-term objectives. This critical hire will help this organization by representing the GMP Quality function to Regulatory Authorities and reach their next strategic milestone.
